PART-TIME COURSE

Course outline

This course will provide you with the opportunity to understand garment construction, to sample, fit and alter toiles and to produce a garment to a professional standard. You will investigate and demonstrate a practical understanding of the technical processes to create a comprehensive range of technical samples including some tailoring methods. After a critical evaluation you can select some technical processes to realise your designs.

Course subjects:

- Taking measurements and constructing basic blocks
- Pattern blocks to include a bodice, skirt, trousers and one piece sleeve
- Pattern adaptations to include; dart manipulation and cut and spread
- Construction of master patterns and samples
- Basic construction and sewing skills
- Proficient handling of industrial sewing machines
- Pressing techniques
- Formation of a reference manual of all pattern blocks studied

Assessment

Summative assessment will take place at the end of the module when students will present a portfolio of work to include:

- Patterns & toiles
- Technical File
- Evaluation commentary

Entry requirements

We don't ask for any formal qualifications, and it isn't necessary to have knowledge of pattern cutting and sewing as this course will teach the basics. However, we do believe you'll get more out of our course if you have an interest in and experience of art and design more generally.
